

Medical Information Contacts

A CPD session, titled “**Medical Information Workshop**”, jointly arranged and sponsored by the Pharmaceutical Society of SA, the SA Association of Pharmacists in Industry and the Pharmaceutical Industry Association of SA, was held on 3 March 2010. At this workshop it was agreed that a list of the names and contact numbers of Medical Information personnel would be provided to members of the Pharmaceutical Society. The objective is to enable pharmacists to have easy access to persons and organizations in the pharmaceutical field in order to obtain information on products and services. This is particularly important at this stage with visitors from across the globe visiting South Africa for the FIFA World Cup. We thank the companies and the following organizations for collating and providing this valuable information:

Pharmaceutical Industry Association of SA (PIASA)
Innovative Medicines South Africa (IMSA)
Pharmaceuticals Made In South Africa (PHARMISA)
Self Medication Association of South Africa (SMASA)

Please keep the list on file for future reference.
